

# WHY CHOOSE DONNA ISD?

## TAKE A LOOK!

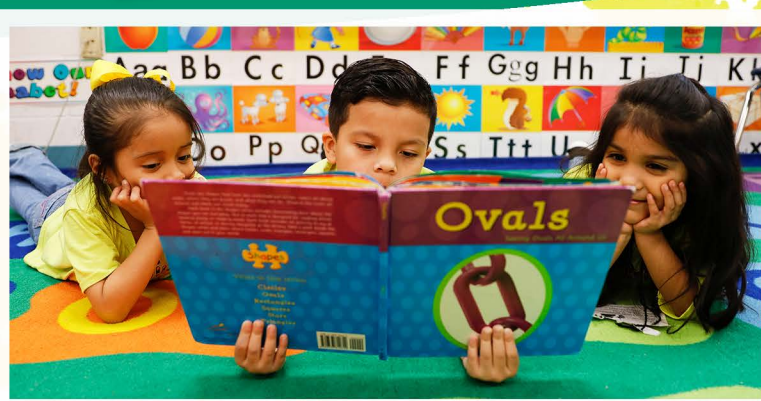

### OUR ELEMENTARY CAMPUSES OFFER:

## FREE FULL-DAY PREK 3 & 4

We have available a free full-day PreK-4 Program for all students across our 14 elementary campuses. We also offer a PreK-3 Program for qualifying 3-year-olds.

So, jump start your child's education now. Our hands-on and fun activities will help your student learn important pre-academic skills that will instill a love of learning.

## MAGNET CAMPUSES

Salinas Elementary S.T.E.A.M. Campus offers interested students an opportunity to focus their studies in the areas of science, technology, engineering, arts and mathematics.

M. Rivas School of the Arts provides a pathway for children fascinated with the fine arts by incorporating specialized instruction in music, dance, theatre, and visual arts.

Your child will enjoy our exciting and innovative programs and be prepared for academic success as they continue their education.

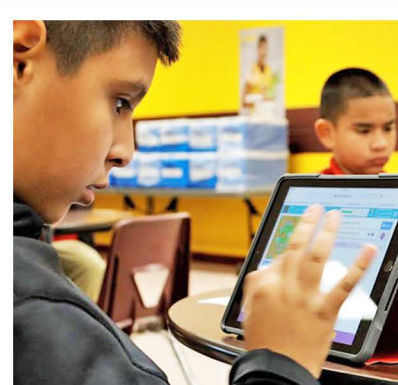

## TECHNOLOGY RESOURCES

### WE ARE EMPOWERING OUR COMMUNITY THROUGH TECHNOLOGY.

We purchased one-to-one devices for all our students and teachers.

We invested in hundreds of hotspots and a dozen WiFi towers that were installed strategically across the district to support students with little or no internet service.

## DUAL LANGUAGE BILITERACY MODEL

We are the only school district in Region One that offers a Dual Language Biliteracy model in which PreK-5th grade students learn to read and write in all core subjects in both the English and Spanish language.

Students receive an enriched bilingual, biliterate, and bicultural education that will prepare them to be academically successful and more marketable in the job market.

## STEM SUMMER PROGRAMS

We are one of only a few school districts in the Rio Grande Valley that offer a STEM summer camp to students as young and 5-year-olds. Our K-2 Coding Minions Camp introduces children to the fundamentals of coding which involves subjects like math, science, and technology. Students acquire skills like teamwork, critical thinking, problem solving, patience, and communication.

We also provide a STEM Camp for older students where they are able to interact and engage in activities that relate to the sciences.

## SCHOOL CLUBS

We have available an array of Student Clubs that focus on academic subjects, hobbies/interests or making an impact in the community. Our campuses offer Chess, Spanish, Robotics, Folklorico, Arts & Crafts, Garden, and Cooking among other clubs.

Clubs provide students a channel for reinforcing lessons learned in the classroom and an opportunity to apply academic skills in a real-world context resulting in a well-rounded education.
